

---

# *Cargo Vessels*

---

To calculate safe arrival draft:

Add 1.8 m to tide table for daylight tides

Add 1.5 m to tide table for night tides.

All tides calculated in fresh water.

Vessels over 90m can only enter in daylight tides.

Above is based on tides making predictions

---

# *Tankers*

---

To calculate safe arrival draft:

Add 1.0 m to tide table for daylight tides

All tides calculated in fresh water.

All tankers are daylight navigation only.

Above is based on tides making predictions
